Experiences and projects

mid 2012– **Front end engineer, Toro.**

present Design and implementation of web tools to manage Toro's products. Maintains and upgrades existing application and brought automated testing tool along with a clean development process to the front-end part. Intensive usage of jQuery, emberJS, bootstrap (less) and phantomJS/casperJS.

2011– **Tester, Toro.**

mid 2012 QA and performance testing. Developed automated tests for Toro's server and take care of performances (tomcat and oracle), used Java with JMeter and JMX for the profiling.

2008 **Research project** about schedule optimization in optical networks.

Education

2009–2011 **Master research, Tsinghua University, Beijing, China.**

Major in Software engineering and networking (all in chinese).

2008–2009 **Intensive chinese courses, Beijing Language and Culture University, Beijing, China.**

2006–2008 **Master of engineering, Télécom Paristech, Paris, France.**

General engineering school, top 5 in France. I focused on Software engineering and computer science

IT skills and Languages

Web **Fluent in javascript, coffeescript and jQuery.**

daily programming in coffeescript for 8 months – read *Javascript, the good parts* and *Effective javascript*

– **Frameworks and libraries.**

daily usage of **canJS**, some knowledge about emberJS, **D3** for data visualisation, **Twitter bootstrap**, **casperJS** for the testing with phantomJS

– **Good knowledge about HTML and css.**

Frequent usage of **less**

Dev tool **Linux** and its awesome shell, **vim**, **git**

Other Apache, Java (and spring), Scala (with akka), fonctionnal programming

French **native**

English **fluent**

Chinese **advanced**
(mandarin)

read books in chinese, participated in the chinese TV show 非诚勿扰

Interests and activities

– **hiking, ice skating**

– Strong interest in **new technology and science** – Read hacker news and slashdot to keep up to date with new technologies
